

ALIVE[®]

We are specialized in the field of Modular OT, ICU, NICU, CCU, Cardiology, Radiology and Imaging, Neurology, Urology, Dialysis, Medical Furniture & Others.

Product Catalogue

“Our main purpose is to help healthcare providers diagnose, monitor and treat diseases of the patients so that everyone can live to the fullest”

“Building a better Healthy Nation”

Our company is committed to help the nation to build sustainable healthcare system through quality healthcare products.

Our commitment begins with the quality of our work. We offer cost effective solutions that meet or exceed the quality standards that our customers have come to expect. Part of quality means having a quality staff. Our staff is comprised of personnel who have local as well as international experience in Engineering, Sales and marketing & administration. We are proud to offer our services and will continue achieving the best. Recognized as a leader for providing healthcare devices and products all over the country.

Vision Statement

Recognized as a leader for providing healthcare devices and products all over the country. The Vision of Alive Healthcare Limited is to be the first choice for medical devices in the communities we serve. We deliver on our vision by striving for excellence every day and constantly seeking to improve the services we offer.

Md. Mahbub Hasan Rony

Managing Director
Alive Healthcare Ltd.

Dear Partners and Friends

We are glad to present to you our medical product- range which meets the requirements and needs in the hospital field. Alive Healthcare Limited is one of renowned companies for medical devices and healthcare products in Bangladesh.

Alive Healthcare Limited has been distributing Medical Devices and Healthcare Products in the Bangladesh market since 2009. Since its formation, Alive Healthcare Ltd has positively transformed the healthcare sector of the country. By distributing innovative medical technology from world-class manufacturers.

Alive Healthcare aims to further propel the Bangladeshi Healthcare sector to new global heights. With more than 20 principals and faithful customers in private, public and NGO sectors, it is no surprise that Alive Healthcare Ltd leads the Bangladeshi healthcare industry in all sector. Working as the exclusive distributor for some of the world-renowned brands in Bangladesh, we provide specialized Turnkey solution in the fields of Modular OT, ICU, CCU, NICU, PICU, HDU, Cardiovascular-Diagnostic, Neuro-Diagnostic, ENT Diagnostic, Laparoscopy, Medical Furniture, Medical Gas Pipe Line Solution, Imaging, Dental equipment and Ophthalmology. Our company has One Headquarter, two outlets, one display center and six branch offices are in different division.

Alive healthcare Limited is led by Medical devices and Furniture with more than 70 employees (GM, AGM, Sr. Manager, National Sales Manager, Business Manager sales, Manager customer support, Product Manager, Regional Sales Manager, Territory Manager, Service Department and others)all over Bangladesh. More than 20 of them are dedicated service Engineers.

Our Behaviors

- Eager to win
- Take ownership
- Team up to excel

Encompassing enormous experience and knowledge in the medical field empowers us to deliver reliable products and services through our well established Hospital network. We always believe innovation, quality and responsibility are the keys to benefit the healthcare professionals. We are always be helping our users and patients to see life more clearly.

Our Goal

To reduce barriers to efficient, affordable healthcare system for the underserved. Our goal is to establish quality healthcare system all over the country through highest quality of healthcare devices and excellent level of service.

55 years of innovation and development in electronics field since 1969

Ultrasound System

We designed SAMSUNG HERA, RS, V, HS series and HM70 Evo to give you the confident results you need, in the time you have.

System architecture:

1 million to 40 million total digital channels, ultra-low noise, Dynamic range 256 dB, Frame Rate up to 5000 frames per second, Hard drive 512 GB to (Expandable 1 TB), Transducer frequencies up to 22 MHz, Depths 55 cm, Optimized for high definition (21"-27") LED & OLED display.

Software:

AI Feature: S-detect™ (Breast/Thyroid), NerveTrack™, Adult Echo Measurement, 5D Follicle, OVIX, Uterine Contour, HeartAssist™, ViewAssist™, MPI+, BiometryAssist™, LaborAssist™, EzHRI, Auto Annotation.

GI: Elasto Scan™, E-Strain™, Nerve Track™, S-detect™ (Breast/Thyroid), S-Shearwave Imaging™ FAT Quant-ification QUS (TAI, TSITM), MV Flow™, Lumi Flow™, S-Fusion™.

OB: Biometry Assist™, Labor Assist™, Smart 4D, Hello Mom™, 5D NT™, 5D CNS+™, 5D Heart Color™, XI STIC.

GYN: CEUS+ (HyCoty), IOTA-ADNEX, Uterine Assist™, 2D Follicle™, 5D Follicle™, E-Cervix™.

CV: Arterial Analysis™, AutoIMT+, Auto EF, Strain+, StressEcho, HeartAssist™ for Adult AI.

Application: Abdominal, Obstetrical, Fetal echo, Vascular (peripheral, cerebrovascular, temporal TCD, and abdominal), Abdominal vascular, Gynecological and fertility, Small parts and superficial, Musculoskeletal, Pediatric general imaging, Prostate, Echocardiography (adult, pediatric, fetal), Stress echocardiography, Interventional imaging, Bowel imaging, Strain elastography.

55 years of innovation and development in electronics field since 1969

Digital Radiography

Transform the healthcare experience with Samsung Digital Radiography systems.

Product Details

- Fully automated operation along with the tube head unit motorized wall stand and patient table.
- To provide advanced low dose imaging and streamlining workflow saves more time to focus on improved patient care.
- Auto-positioning makes it moves to more than 500 exam positions and controlled with a handheld wireless remote control.
- Auto-tracking synchronizes the movement of the tube and detector automatically to reduce repetitive workflows.
- Glass-Free Detector is more comfortable imaging experiences lightweight and image quality with high DQE (76% @0lp/mm).
- SID Guide (Source to Image Distance) supports detailed device positioning with multiple SID settings. (3 SID Types : 100/130/180 cm)

Mobile Digital Radiography System

Celling Digital Radiography System

62 years of innovation and development in cardiology equipment since 1962

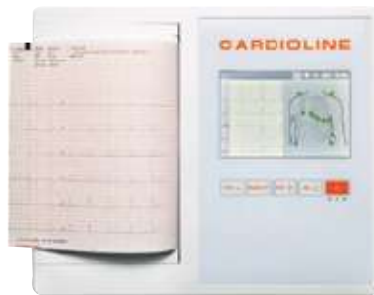

Leading Diagnostic Cardiac Solutions Anytime Anywhere for Everyone.

Enter the Cardioline world

ECG Machine 200S

Holter Monitoring System

Wireless ETT Machine

Cardiology Solution

ECG Machine: 12 Lead ECG Channel, 7" Color LCD Display, A/D Converter: 24 bit, Sampling rate: 32000 samples/seconds/Channel, Internal Battery: More than 500 ECG of Fully Charge, Printing Page: A4 Z-Fold Paper.

ETT Machine: 12/15 Lead wireless Stress Test System, Large Color Touch Screen Display, A/D Converter: 24 bit, Sampling rate: 32000 samples/seconds/Channel, Lead Fail Detection, Acquisition Module: 90 Grams.

Holter Machine: High resolution recordings with user selectable sampling rates of 250/500/1000 samples/ second, 5/7/10 wires patient cable for 3 to 12 lead Recordings up to 7 days, Recorder is a color LCD display with 4-way joystick for easy navigation of menus, Only 100g for patient comfort, A/D converter: 24 bit 96000 samples/second/channel Performance equivalent to 0,05 - 300 Hz (at 1000 c/s).

46 years of experience generating comprehensive solutions for the health sector.

We are the sum of two cooperatives. We are Manufacturers and Distributors of solutions for improving people's quality of life.

Defibrillator Machine

Reanibex 800
Defibrillator

Reanibex 700
Defibrillator

Reanibex 500
AED

General Feature

Monitor Defibrillator multiparameter, Manual and AED up to 200J or 360J, Universal AED algorithm for adult and paediatric patients, 12 leads acquisition, ECG interpretation, Non invasive pacing, SpO2, Large colour display 8.4" Monitoring and diagnosis capabilities, synchronised cardioversion, Audible and on screen Messages guide the user through the operation protocol, Prints automatically with a marker shock or an alarm, Battery capacity and status indication on screen.

Waveform	Biphasic truncated exponential adjusted to the impedance of the patient
Charging Time	Less than 5 seconds at 200 Joules with a new fully charged battery Less than 7 seconds at 360 Joules with a new fully charged battery
Range of patient impedances	15 to 200 Ohms
Selectable energy levels	1-10, 15, 20, 30, 50, 70, 100, 125, 150, 175, 200, 250, 300 and 360 Joules

88 years of innovation and development in operation light since 1936

2R Double Reflelection Technology

7 Colour Temperatures

OT Light

In 2002, RIMSA developed the world's first LED operating theatre lamp at a time when this technology was still in its infancy.

General Feature

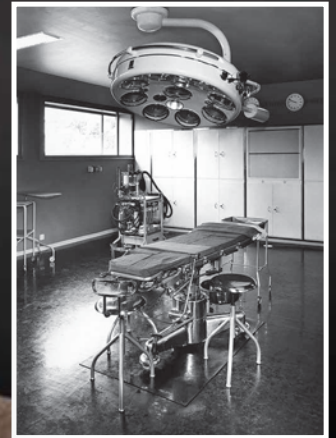

2R Double Reflection Technology, To Remove Glaring Effect, A Comfortably Affordable Surgical Light, Electronic Diameter Adjustment, Light Intensity at 1 M Distance (Ec) 160,000 Lux, Light Field Diameter adjustable from 110-350 mm.

Universal Electro-hydraulic OT Table

FLUENT USABILITY Since 1901

"In addition to the exquisite quality of work, we have taken the utmost interest in the functionality of the equipment. In this regard, several doctors committed to the cause have contributed their advice, based on their valuable experience."

Juho Merivaara in 1926, founder of Merivaara

In a modern operating room from the 1950s tables and lights were manually adjusted.

**DESIGN[®]
FROM
FINLAND**

Our success and experience make us the healthcare provider that we are today.

Application examples:

- Laparoscopy
- Endoscopy
- Arthroscopy
- Orthopedic
- Spinal
- Vertebroplasty
- Hemorrhoids
- Hernia
- Tonsilectomy
- Gynecology and urology

"The operating table is so low that pregnant mothers can easily sit on it."

"Table design makes C-arm imaging easy."

Sami Elamo, MD, M.Sc. (tech),
Consultant in Orthopaedic
and Trauma Surgery

COMPATIBILITY WITH C-ARM

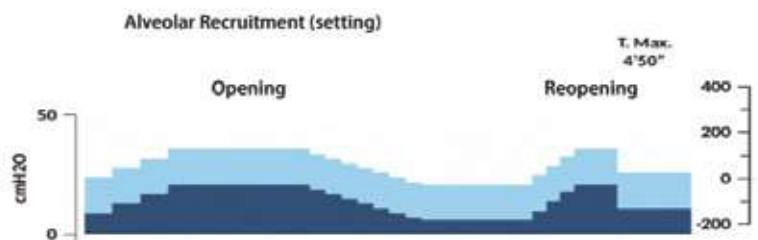

The Smarter Practico and its accessories allow for easy C-arm access.

The Anesthesia workstation Focused on you

Lung protective ventilation

- Equipped with the most advanced ventilation modes.
- Automatic recruitment maneuvers, w optimal PEEP calculation.
- Advanced volumetric capnography in

Design and ergonomics

- Complete and intuitive interface with settings, ventilation monitoring, anaesthetic gases monitoring, graphics, trends, AGSS performance, alarms with troubleshooting guide, medication and events management.
- All the auxiliary devices currently demanded, are embedded in the anaesthesia machine.
- 18.5" (47 cm) projected capacitive touchscreen, supported on a 360° rotating and 2 axis tilting arm, including a LED lighting bar to illuminate the worksurface, controlled from the user interface.

Versatility

- Beyond the new standard Compact Anaesthesia Breathing System (CABS), genesis is ready to operate with any re-breathing, semi-closed and non-re-breathing circuit.
- The integration of Masimo® capnography and multigas anaesthesia main-stream and side-stream options, and real-time oxygen paramagnetic allows a complete ventilatory monitoring.
- Any ICU hemodynamic monitor and any infusion pump configuration can be added in 2 auxiliary arm stands.

37 Years of innovation and development in the Hospital Bed and Medical Furniture Sector.

Hospital Bed and Medical Furniture

- Steel tube structure with a epoxy coating
- This is made of fibre board and coated with PVC.
- It has an anti-slip profile at the lower edge.
- Its height adjusted from 69.5cm to 101cm
- This is mounted on a metal frame with 4 pivoting wheels (two with brakes) with diameters of 50mm

Over bed Table

- The table is formed by a white frame made of fibre with an external PVC coating.
- It has a sliding drawer made of fibre and coated with PVC (in the colour of your choice).

Cabinet

Transport Stretcher

Developed to ensure quick and safe transport of the patient, with the possibility of using them for diagnosis and treatment.

The elements for control of Transmed stretcher are easy to use thanks to the hydraulic and pneumatic systems. The fifth wheel improves the stretcher rotation, thereby reduces the effort required to move it. It can be handled with greater precision, which is fundamental to cross narrow.

52 years of innovation and development in mechanical ventilator since 1972

(Adult, Pediatric & Neonatal) Ventilator

Ultimate touchscreen

High resolution 18" touchscreen with intuitive user interface makes the ventilator's operation not only easy but quickly.

High-end mechanical ventilator that provides invasive and non-invasive ventilation, adaptable to any patient category. Committed to life.

- Compact design
- Comprehensive monitoring
- Alternative air supply
- Volumetric capnography
- Non-invasive ventilation
- Endotracheal tube compensation
- Intra-hospital transport

Features

- Neonatal/pediatric through adult applications.
- Integrated invasive and non-invasive ventilation.
- Automatic leak compensation.
- Integrated software for volumetric capnography.
- Comprehensive respiratory mechanics package.
- Neonatal proximal flow sensor.
- Endotracheal or tracheotomy tube compensation.
- 72 hours of trends.
- Internal battery capacity > 2.5 hs.
- 510(k) cleared.
- CE approved.

30 years of innovation and development of Infusion Pump since 1994

Syringe Pump

Syringe Pump

- Syringe Size : 10, 20, 30, 50/60 ml
- Applicable Syringe : Compatible with syringe of any standard
- VTB : 0.1-9999 ml.
- Flow Rate : 0.1-1300 ml/h.
- Accuracy : $\pm 2\%$ (mechanical accuracy $\leq 1\%$).
- Infusion Mode : Flow rate: ml/min, ml/h. Time-based.
- Drug Library : Available
- Battery Life : 7 hours at 5 ml/h.

Infusion Pump

Infusion Pump

- Pumping Mechanism : Curvilinear peristaltic.
- IV Set : Compatible with IV sets of any standard
- Inbuilt Thermostat : 30-45°C, adjustable.
- Infusion Mode : ml/h, drop/min, time-based.
- Air-in-line Detection : Ultrasonic detector.
- Accuracy : $\pm 3\%$.
- Occlusion Sensitivity : High, medium, low.
- Battery Life : 5 hours at 30 ml/h.

Feeding Pump

Feeding Pump

- Suck and flush
- Fluid warmer at adjustable temperature
- at adjustable rate
- Touch screen
- Fluid Warmer optional with adjustable temperature 30~40°C
- Flow Rate : 1-2000 ml/h (in 0.1 ml/h increments)
- Feeding Mode : Continuous, Intermittent, Pulse, Time, Scientific. Flush

DVT Pump

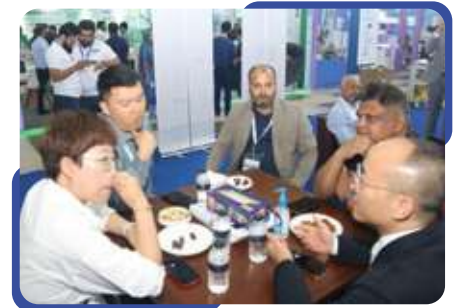

DVT Pump

- Chamber : 4
- Working Mode : 8
- Working Time : 0-99 mins
- Interval Time : 0-60S
- Pressure : 0.20-160 mmHg
- Display : LCD+indicator
- Data Entry : Touch screen+key
- Pressure Accuracy : ± 10 mmHg
